

How to operate

HHT handheld scanner Workabout Pro4

- The name **Workabout Pro4** is written at the bottom right of the glossy edge round the screen

Turn On/Off:

- Use the **On/Off**-button

Restart:

- Press **FN- On/Off** and hold it down for about 5 sec.

Scanning power Up/Down:

- Down: Press F3
- Up: Press F4.

Battery check:

- Press **FN** followed by 1

Normal use:

- Start "Pack and Sea"
- Log in using your specific user name and password
Must be online
- Scan crates, crate handovers
The terminal can work offline, data is automatically delivered later

Auction scanning:

- *The terminal must be online*

Always leave the terminal logged out

- New software versions will come automatically when you log in

"Light" in the P&S login display is:

- **GREEN:** If all data has been delivered
- **YELLOW:** If data is being delivered
- **RØD:** If there is data that cannot be delivered

Network management

Scanner Pro4 uses the program *Fusion* for network management

- Create profile under "*Find WLANS*"
- Change profile under "*Manage Profiles*"

Fusion is used if the error "No connection to the server" is displayed

In case of network problems - see the guide "*Guide PRO4 – Wireless network setup*"

In case of problems, contact:

Carsten (+45) 61797806, Bent (+45) 40586083 or Susan (+45) 30115298. Pack and Sea will contact Lyngsøe.
